

MiyoFEEL CP-A

Description :

Amino acid treated cellulose powder, designed to replace microplastics such as Nylon or PMMA. The treatment improves emulsion stability and texture, making MiyoFEEL CP-A a viable and sustainable alternative to synthetic texture enhancers.

Benefits:

- Based on biodegradable cellulose powder
- Excellent replacement for Microplastic beads (PMMA, Nylon...)
- Improves emulsion stability
- Improves texture
- Based on upcycled ingredient
- Soft focus effect
- SPF Booster

Recommended Usage:

- 5-25% for liquid application
- 5-25% for compact powder

Certification:

*

In progress

INCI :

Cellulose (and) Stearoyl Glutamic Acid

NOC: 100%
